

BROOKLYN THERMOMETER COMPANY INC.

6" Dial Hygro-Thermo-Meter

6" Dial Hygro-Thermo-Meter, Direct reading combination hygrometer and thermometer in a 6" diameter case drilled for wall mounting. The 0 to 100% Relative Humidity scale in 1% divisions utilizes our Polytherm synthetic sensor for $\pm 3\%$ accuracy. Recalibratable. The thermometer has a dual scale of -10 to 120°F and -20 to 50°C, both in 1° divisions. The bimetallic coil sensor provides accuracy of $\pm 1^\circ\text{C}$. A beautiful and sturdy silver, chrome, and glass style. An accurate Relative Humidity Indicator is necessary to assess and if necessary to influence the moisture content of the environment of persons, products, and materials. Our Precision Hygrometer combines excellent accuracy and stability with reasonable cost. The Polytherm synthetic sensor developed especially for this application assures $\pm 3\%$ accuracy over 35 to 80% R.H. It may be regenerated and recalibrated for permanent accuracy. It may be used safely in temperatures of 32 to 200°F. NIST traceable Factory Certification is available at additional cost, call for details.
